TEXAS Instruments

Home»TEXAS Instruments

Texas Instruments Innovation Lab is dedicated to supporting educators, researchers and students in facilitating the inclusion of TI analog and embedded processing in engineering classrooms, teaching and research labs, textbooks, design projects and course curriculum. It organizes seminars, exams and workshops for the students to make them industry ready. Industries prefer students having more practical knowledge along with theoretical knowledge. TI Innovative Lab assist students to come up with their own new project ideas and build them using TI kits. TI lab is equipped with various kits of Texas Instruments. TI kits are available under three sections which are as follows: Ultra low power embedded kits (set of 21) DSP Kit (Set of 4) Robotics kits (set of 31) Students can have hands on practice on these kits and learn about it.

It organizes seminars, exams and workshops for the students to make them industry ready. Industries prefer students having more practical knowledge along with theoretical knowledge. TI

Innovative Lab assist students to come up with their own new project ideas and build them using TI kits.

TI lab is equipped with various kits of Texas Instruments. TI kits are available under three sections which are as follows:

The main objective of Texas Instruments Innovative Lab is To bridge the gap between industry and academics. To provide a competitive edge by helping students to learn, analyze and apply theoretical concepts and develop Industry level technology. To provide experiential learning where students can solve real world problems using state of the art technical material.

Benefits : Exposure to real industrial products. Hand on training on Siemens products & certification with Siemens instruments University program logo. shortened start-up times and faster troubleshooting for actual project development. Employability for students will increase.

Benefits :
